

Federal Republic of Somalia
Ministry of Energy and Water Resources
Office of the Minister

Ref: MOEWR/ OM/ 88 /24

Date: 1th April, 2024

SUBJECT: ENDORSEMENT OF THE ELECTRICITY SUPPLY INDUSTRY STUDY RECOMMENDATION

The Ministry of Energy and Water Resources has endorsed the roadmap to reforming the Electricity Supply Industry (ESI), based on recommendations from the ESI Institutional Structure Option Analysis Study conducted by the Ministry.

The Ministry of Energy and Water Resources undertook a comprehensive study to review the existing electricity sector institutional arrangements in Somalia, with the objective of ensuring an efficient Electricity Supply Industry. The study outlines the current state of the electricity Supply industry (ESI) in Somalia and explores options for future development of Somalia's electricity sector. The proposed institutional arrangement in the ESI is instrumental in driving our vision for an efficient and sustainable electricity supply industry.

The Ministry of Energy and Water Resources is committed to reforming the energy sector, with the goal of ensuring that reliable and affordable electricity is accessible to all.

The implementation of the recommended institutional structure of the ESI study is part of the Ministry's venture towards re-establishing and development of the electricity market, which laid a solid ground for subsequent achievements including the approval of the Electricity Act, its regulations, and the establishment of the National Electricity Authority.

H.E Jama Taqal Abbas
Minister
